Dear Professor Aydogdu,

I have gone through your paper entitled "The momentum 4-vector in bulk viscous Bianchi type-V space-time" by Oktay Aydogdu and Mustafa Salti (Czech. J. Phys., Vol. 56 N0. 8 (2006),789-798 which is attached with your mail.

**I declare that the object of your paper is quite different that of my paper (gr-qc/0611031).
Definately, you have not plagiarized my paper.**

Regards, Sincerely
A. Pradhan

Dear Dr. Oktay Aydogdu,

really this action is very stranger and i heard about this kind of action for the first time. In my paper I introduced the Landau-Lifshitz, Einstein and Bergman-Thompson pseudotensor to teleparallel gravity and only consider the energy of the closed universe in this framework. In your papers you consider the energy momentum for Bianchi type V and topological BH, so **these are not plagiarism**.

Only one comment:i am not professor, only postdoc.
Best regards,
T Vargas.

Subject :Re: about "hep-th/0308158"

Dear Dr Aydogdu

I have no knowledge of the events leading to the withdrawal of your papers, although I did notice the withdrawal.

I have looked at your paper, as attached to your email, and I looked again at my paper

arXiv:hep-th/0308158,
Title: Braneworld cosmological models with anisotropy,
Authors: Antonio Campos, Roy Maartens, David Matravers, Carlos F. Sopuerta,
Journal-ref: Phys.Rev . D68 (2003) 103520

I have not made a careful study of your paper, but have only looked at the issue of its relation to my paper. **There is no plagiarism of my paper that I can detect, and I cannot see any direct relation between the topics of my paper and yours.**

Sincerely, Roy Maartens,

Dear Professors,

I write to you concerning the removing of the paper "The Momentum 4-vector imparted by gravitational waves in Bianchi-type metrics" by Ali Havare, Murat Korunur (Mersin U.), Mustafa Salti (Middle East Tech. U., Ankara). **I do not consider that the authors plagate my paper.**

I wish you all the best!
Sincerely Yours,
Irina Radinschi

To : oktay231@yahoo.com

Dear Dr. Aydogdu,

Apart from generalities, I could not find any of the alleged plagiarism concerning the essential part of my papers. Further, **my works are cited in yours papers, so I do not find any problem.**

Sincerely Yours,
Irina Radinschi

Subject: Re: plagiarism of your papers

Dear Oktay Aydogdu,

I have written and published five (5) papers on pseudotensors.
However, I haven't done any work on braneworlds and teleparallel gravity.
I really do not understand how you could plagiarize my papers
since we are working in the same research field BUT on DIFFERENT problems.

Therefore, you have NOT plagiarized any of my papers.

Sincerely Yours, Elias C. Vagenas
